Manual Vertical Tilt-Frame Band Saw

Introduction

V-1822 is a multifunctional vertical saw for double mitering cutting. The saw bow can be rotated and locked in any angle between 0~60 degrees left and right manually. (Hydraulic is optional) The saw bow can also be manually tilted forward from 0-5 degrees to achieve the best cutting effect of various material shapes.

With vertical saw designs becoming more popular amongst fabricators, the V-1822 takes Cosen's popular tilt-frame design and applies to a rigid yet small footprint.

The operator's control station located on the front side of the machine is convenient and user friendly.
